Stand magnifiers with LED handles to use when reading for longer periods enabling you to keep a fixed focus length with a bright LED light.

The stronger the magnification the closer the lens is to the object.  
For both the Eschenbach and Schweizer brands below we list magnifier heads and handles separately to make it easy for you to purchase if you only require the head or a replacement handle.

**Please order both handle and magnification head you require**

**META AI GLASSES - RAYBAN**

META	Meta AI Glasses - Wayfarer Black/Clear(Gen2)	£315.83
META	Meta AI Glasses - Wayfarer Black/Graph(Gen2)	£340.83
META	Meta AI Glasses - Wayfarer Black/Trans(Gen2)	£382.50

The Ray-Ban Meta AI glasses combine iconic style with Meta AI. React to what you see, take pictures and videos, listen on the go, make calls and send messages without touching your phone. Get real-time info and suggestions with Meta AI. Ask your AI glasses about landmarks that you pass by, for recipes while on the go and even to remind you where you parked. See website or call our offices for all the fantastic things that Meta AI glasses can do for you!

Capture every moment -  
Record videos in 3K Ultra HD for the highest resolution.  
Ask Meta AI - Get real-time info and suggestions with Meta AI.  
Listen with built-in speakers  
Bluetooth-connected speakers built into the arms of the glasses deliver sound that only you can hear.  
Take video calls, send text or voice messages & make phone calls, all hands-free.  
Imagine this: you glance at a menu in a foreign language, ask Meta to translate and see the updated text instantly. You're strolling down a busy street and directions appear right in your line of sight. Or you catch a sunset and record it hands-free, then share it with friends in a snap. That's just a glimpse of what AI glasses can do.

**GLARE PROTECTION - UV FILTER EYE SHIELDS**

Percentages relate to light transmission, the lower the number the darker the shields. NOIR filters prevent greater than 99% of all glare-causing high-energy short wavelengths from reaching the eye. All filters absorb ultraviolet radiation to 400nm, with many lenses also blocking blue light, protecting the retina from high-energy wavelengths which may contribute to the degenerative process culminating in macular degeneration.

U21	UV Eye Shield 28% Grey medium size	£15.00 + VAT
