Edward Marcus Ltd has been supplying magnifiers, task lamps, magnifying lamps and low vision aids to the general public, opticians, optometrists, low vision schemes, blind & partially sighted associations, hospitals, schools, businesses and the health & beauty profession since 1945

Please note we can supply the full range of Eschenbach, Coil, Schweizer, Magnifico, UltraOptix, Daylight and RNIB products and have the largest stock holding of magnifiers and lamps in the UK.

Please contact our offices if you wish to order anything not shown in this catalogue or for any advice.

You can order by telephoning our offices on 01302 852679, by email at sales@edwardmarcus.co.uk or for retail sales you can buy online at www.edwardmarcus.co.uk

We have moved premises - new address and telephone number on the front page. Visits by appointment only - please telephone 01302 852679 to make an appointment if you wish to visit

If you are registered as blind or partially sighted then please order by telephone as you may be eligible for zero rating of VAT on certain products by completing an eligibility declaration form.

Please see page 27 of this catalogue for company information and all our terms and conditions - thank you

Magnifier lens sizes are in mm. If only one measurement is given then the lens is circular and the measurement is the diameter of the lens.

Lens strengths are measured in dioptries (Marked "Dioptries" in the product description).

The effect of the lens on the object/word is the MAGNIFICATION and is shown in the description as an "x"
(for example 4x would make the object appear 4 times larger)

The bigger in size a magnifier lens is – the weaker strength it will be.
The smaller the magnifier lens size – the stronger magnification it will be.
The stronger the magnifier is, the closer you'll have to put it to your eye in order to get a good clear image.

To have longer reading and working distances (the distance between your eye and the page), you will have to use a weaker magnifier, which will not give you as much magnification.

Lens sizes are almost the same for the magnification between different brands. A more expensive brand generally means a better quality lens, improved LED light and more robust handle.

Please see page 26 of this catalogue for a reading text guide that will help you predict the level of magnification that you are likely to require in order to read newspaper size print.

Reading subtitles or watching quiz shows no longer need to be a strain.

Eschenbach's maxTV® is a 2.1x spectacle magnifier designed to make your TV viewing a pleasure.

Worn like a pair of spectacles, this TV magnifier doubles the size of your TV screen, allowing you to watch your favourite shows at a comfortable viewing distance.

Eschenbach Max TV is not just a TV magnifier: sporting events, movies, theatre, bird watching or any other activity that requires magnification can all be viewed 'close-up' due to its generous depth of field.

Available also as a clip on pair to clip on to your distance glasses.

If you have trouble reading books, newspapers, the print on computer screens, labels on medicine bottles, ingredients on food packages, train schedules, recipes, menus in restaurants, or mail –Eschenbach maxDETAIL can help

These hands-free, head-mounted glasses provide 2x magnification and can be adjusted so that each eye lens can be focused separately [± 3 dioptres], making the system adaptable to most people.

The max DETAIL will focus on near objects with working distances of 16 inches and are perfect for any near viewing activity where a magnified image is helpful.

Available also as a clip on pair to clip on to your reading glasses.

Eschenbach Mobilent Folding Pocket Magnifier

The Mobilent from Eschenbach is a folding pocket magnifier that offers high magnification in a compact size with or without added illumination.

Its built-in case is designed to provide complete protection for the lens and the LED light version can easily be turned on when needed by pressing the button on the bottom of the magnifier case. With three powers to choose from (4x, 7x, or 10x) it is ideal for near spotting tasks such as reading price tags, prescriptions, and labels especially in dimly lit settings.

An 18" lanyard is included so it can be worn around the neck and due to its compact size, it fits easily into a pocket or purse.

IMPROVED MOBILITY FOR THE VISUALLY IMPAIRED

NoIR Low Vision Filters are the point where utility and comfort converge, providing essential light management, visibility and protection with an eye on wear-ability.

NoIR sunglasses are available in comfortable and fashionable styles, many with top and side-shield protection and designed to fit over prescription glasses. The NoIR Low Vision Filter System is made in the USA

The NoIR Filter system employs the same technology used for laser protective eyewear, relieving glare by absorbing the short wavelengths of the visible spectrum that can scatter within the ocular media. Unlike polarization which limits glare caused by 'scatter' by reducing only specifically oriented light waves, NOIR filters prevent greater than 99% of all glare-causing high-energy short wavelengths from reaching the eye. All filters absorb ultraviolet radiation to 400nm, with many lenses also blocking blue light, protecting the retina from high-energy wavelengths which may contribute to the degenerative process culminating in macular degeneration. NoIR series filters also cut infrared wavelengths, 'cooling' the light by reducing the heat energy of the sun to provide a more soothing, comfortable viewing experience.

The full range of Daylight Company products are available from Edward Marcus Ltd.
Please let us know if there are any products you would like that do not feature in this catalogue over the following pages.
To see the full Daylight range or to get full descriptions and specifications for all the lamps shown then please visit our website at www.edwardmarcus.co.uk

DAYLIGHT HALO TABLE MAGNIFYING LAMP by The Daylight Company

BT BIG BUTTON 200 CORDED PHONE

DH216X	BT Big Button Corded Phone
--------	----------------------------

This easy-to-use white, landline telephone with big buttons and built-in stand gives you the option of using the corded handset or the hands-free, loudspeaker option to make incoming and outgoing calls.

The phone features speech amplification and is fitted with an inductive coupler, so it is hearing aid-compatible. The additional "loud" button also boosts the caller's voice by up to 16dB. The phone has three standard ringtones, adjustable ringer volume control and a visual ring indicator.

The large black number pad buttons have great contrast against the white phone casing and white text; they are well-spaced, and each button measures 2cm high.

Includes three one-touch memory buttons to easily dial your most important numbers, and you can store an additional 10 numbers in your quick dial memory.

SWISSVOICE XTRA 1110 AMPLIFIED CORDED PHONE

DH434	SwissVoice Corded Phone
-------	-------------------------

Swissvoice Xtra1110 is an excellent amplified, corded telephone that offers large dialling keys with braille dots on a spacious keypad and great sound quality. This easy-to-use corded white phone is made for people needing maximum comfort.

Use the six photo buttons to instantly call your closest friends and family – or use one of the buttons as an SOS key. The phone also has two extra

one-touch memory keys to make calling regular contacts easy.

This phone is hearing aid-compatible. The large black dialling keys have high contrast white numbers and braille dots, and are set in a spacious keyboard.

SWISSVOICE XTRA 2355 DECT PHONE

DH462	Swissvoice Xtra 2355 Dect phone
DH463	Swissvoice Xtra 2355 Dect phone with extra handset

Stay connected with the important people in your life and block unwanted calls using the Swissvoice 2355 amplified cordless phone with answering machine. With its talking keypad, large buttons and great sound quality, it's really easy to use. This excellent amplified cordless landline telephone has been designed with sight loss and hearing loss in mind. The spacious keypad has large, high contrast number buttons (1.3cm) which will also speak when pressed to make dialing easy. The phone is hearing aid-compatible and has great sound quality. The Xtra 2355 is super loud, with a ringer volume of up to 90dB and an audio boost volume of up to 40dB. As well as getting the flexibility of a cordless handset, the base unit gives you four photo memory buttons (2.5cm) to make calling those favourite people even easier.

Available in model DH463 with two handsets.

SWISSVOICE XTRA 3355 CORDED AMPLIFIED TELEPHONE WITH ADDITIONAL CORDLESS HANDSET

DH461	SwissVoice Corded Phone with cordless handset
-------	---

Never miss calls and follow conversations clearly with the Swissvoice Xtra 3355 corded and cordless phone with answer machine. This phone is hearing aid-compatible and offers answer machine, one-touch dialling keys, speaker-phone and talking dialling keypad (numbers only).

This is the perfect solution for anyone who wants the security of a corded phone as well as the mobility of a cordless phone.

Use the photo buttons on the corded phone to instantly call your closest friends and family – or use one of the buttons as an SOS key. The cordless phone has four memory keys on the handset to call regular contacts instantly. Both phone keypads are equipped with large keys (white text on black) and talking digits to avoid any dialling mistakes.

RNIB TALKING ANALOGUE CLOCK - CODE: CC71

This analogue talking clock combines an easy-to-see face, with bold black hands and numbers, along with a talking function that announces the time and date in RNIB's natural male English voice.

The clock also announces the day of the week. The clock case is black and the major control buttons and switches are white, providing great colour contrast for ease of identification.

The oval white clock face sits centrally on the front of the clock, and this is surrounded by the contrasting black case. The hour and minute hands are bold and black inset on the end of each hand is a yellow marker, the sweep second hand is red.

RNIB TALKING CUBE CLOCK - CODE: CC36

This simple alarm clock announces the time at the press of a button in a natural male English voice and all mode settings are spoken.

The clock also features an optional hourly announcement, five alarm sounds and a volume control with an easy to see tactile yellow button.

Requires 4 x AA batteries

RNIB COMMUNICLOCK - CODE: CC53

The fuss-free, best-selling RNIB Communiclock updates automatically and announces the time and date in a clear male voice. It's also small, so it won't take up valuable space on your bedside table.

Simplicity itself, press the large black, contrasting button on top of the clock to hear the time, or press and hold to hear the date, month, year and day. This portable talking clock features RNIB's natural English male voice with adjustable volume. Menu buttons are concealed underneath.

Battery-operated but can also be mains-powered (adaptor available separately).

VERBALISE EASY-TO-SEE LARGE WATCH - CODE: CW256-K

This modern, stylish watch has a clear white face, with bold, contrasting black hands and numbers and a red second hand.

The polished stainless-steel case is complemented by a comfortable black silicone strap with buckle.

The watch is also water-resistant up to 5 ATM, meaning that it is suitable for a shower or surface swimming only.

**LIFEMAX ATOMIC TALKING WATCH, LARGE, BLACK LEATHER STRAP
CODE: CW239**

This modern, stylish watch has a clear white face, with bold, contrasting black hands and numbers and a red second hand.

The polished stainless-steel case is complemented by a comfortable black silicone strap with buckle.

The watch is also water-resistant up to 5 ATM, meaning that it is suitable for a shower or surface swimming only.

This is only a small selection of the clocks and watches we stock, please visit our website at www.edwardmarcus.co.uk to see the full range and for full product information

LIQUID LEVEL INDICATOR, AUDIBLE AND VIBRATORY - CODE:DK127

This compact, lightweight device has three metallic probes which indicate two separate liquid levels within a cup or mug by triggering audible and vibratory alerts. The first alerts tell you when to stop adding hot water if you also want to add milk; the second alerts tell you when the cup is nearly full.

The device can be used on most cups and mugs, as well as glasses, jugs and (cold) cooking pots. Store your Liquid Level Indicator on the fridge door, using the built-in magnets, so it's always easy to find when you need it.

ORANGE BUMPER STOPS - BUMP ONS - CODE DL25

A pack of 72 round orange flat head BumperStops that are 3mm high. Ideal for marking equipment around your home or office, such as the settings and functions on your washing machine, buttons on a remote control, settings on an oven or important keys on your computer keyboard.

TALKING TINS 20 SECONDS, PACK OF THREE - CODE DK141

Triple pack. A magnetic, reusable voice recorder for easily tagging your food shopping. Yellow circular tin lids where you record a 20 second voice recording of what's in your tins - soup or baked beans?

Also available as a single pack or with a 40 second recorder in a triple pack.

TALKING KITCHEN SCALE WITH EASY-TO-SEE JUG - CODE DK152

This modern kitchen scale with an easy-to-see jug measures wet or dry ingredients and speaks in a clear male English voice.

The slimline scale weighs up to 5kg/11lb and the measuring jug holds up to 1,300ml/ 2.25 pints. A tare function allows you to zero measurements before adding more ingredients.

The scale has clear tactile buttons and a large LCD display, while the jug has bold markings on the outside, showing millilitres, pints and UK fluid ounces. The jug has a foam easy-grip handle and a spout with locating recess to help steady the jug when pouring into another container.

TERRAILLON TALKING BATHROOM SCALE - CODE DH469

A good bathroom scale can be a helpful addition to any health regime – whatever you want to achieve. This battery-operated talking bathroom scale has a large LCD display, adjustable volume controls and a metric/imperial conversion button. It announces your weight in a natural English voice and weighs in either metric (kilograms/grams) or imperial (pounds/ounces).

BEURER CORDLESS LED VANITY MIRROR 5X - CODE: DM40

This illuminated magnifying mirror can help you look your best.

Cordless and portable, this mirror has dual magnification: five times (5x) magnification on one side, and a true image (1x) on the reverse side.

Simply flip the mirror to the side you want to use.

12 LEDs give bright white light to illuminate your face and make your health and beauty routines easy. The power button is located in the centre of the mirror base for ease of use.

FOLDING SYMBOL CANES

MS20	70cm (28 inches) 3 part symbol cane folding
MS22	85cm (34 inches) 4 part symbol cane folding
MS23	100cm (40 inches) 4 part symbol cane folding
MS25	105cm (42 inches) 4 part symbol cane folding

Increase confidence when you're out and about with a symbol cane, designed to highlight to other people that you are blind or partially sighted. Made from lightweight 9.5mm (0.37 inches) aluminium tubing weighing only about 35 per cent of an equal length mobility cane. Folds up so you can pack it away easily when not in use and small enough to fit easily into a pocket or bag. Please note that in some light conditions the colour of the cane may look grey rather than white, however it is still reflective (for example, in car headlights).

Ambutech guide canes and Ambutech long canes are all available online, please visit our website at www.edwardmarcus.co.uk to see the full range and for full product information

PILL ORGANISERS

DH426	Dosett Maxi weekly pill organiser
DH308	Super 8 daily pill organiser

The Dosett weekly pill organiser has 28 compartments, four time slots for each day of the week to help you take your medicines correctly and at the right time. The organiser is labelled in print with the day and times of when tablets are to be taken: Each day and each compartment is also marked with braille.

The Super 8 is a pocket-sized pill organiser suitable for people with regular or complex medication routines. It gives audible and visual alarm reminders up to eight times a day.

HEALTH & WELL BEING

DH404	Beurer BM49 talking blood pressure monitor
DH440	Talking ear and forehead thermometer

This fully-automatic, talking blood pressure monitor for the upper arm provides your systolic and diastolic blood pressure and your pulse rate per minute. The monitor has a large, easy-to-see display with a blue LCD backlight. It stores the average of all measured morning and evening blood pressure values for the last seven days and includes two × 60 memory spaces for data storage.

This talking thermometer measures your temperature from either your forehead or ear and announces the reading within two seconds in either degrees Celsius or Fahrenheit.

Measured body temperatures range from 32 to 42.9C (89.6 to 109.3F) – it will also measure room temperatures from 5 to 59.9C (41 to 139.8F).

OPTICARE EYE-DROP DISPENSER - CODE: DH112

This easy-to-use eye-drop dispenser safely and accurately targets the eye. It also allows you to squeeze your eye-drop bottle with minimum pressure. Clips on to most round eye-drop bottles from 5-15ml.

This is only a small selection of the daily living products we stock, please visit our website at www.edwardmarcus.co.uk to see the full range and for full product information

For full product information, please visit our website at www.edwardmarcus.co.uk

LARGE PRINT SCABBLE - CODE: GB92

The board has large squares with pegs at each corner, so the tiles sit securely in place, and enhanced colours to make it much easier to read. Using the built-in stand, you can easily rotate the board to face you on your turn. Each plastic tile measures 2.4cm square and the bold black letters are super clear in 55 point.

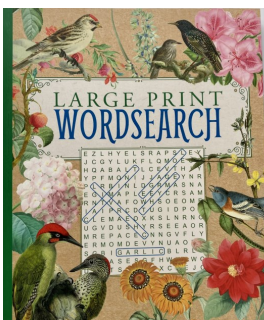

TACTILE DRAUGHTS SET - CODE GB98

The wooden board has large raised black squares to make it easy to feel your way across the board, and all the squares have a drilled hole to help locate the chess pieces into the tiles and keep them in place. Instead of "black and white" counters, the light-coloured wooden pieces are divided between those with and without a tactile circle.

LARGE PRINT PLAYING CARDS - CODE: GC12

Pack of easy-to-see large print playing cards with good colour contrast and bold characters which measure 3.2cm (1.25 inches) in height to make each card easier to identify. The red and black print on the white card provides good colour contrast. The card suits are all easily distinguishable due to the size of the diamond, club, spade and heart images. Picture cards are represented with large print K, Q and J clear letters. Pack also contains three 'wild

LARGE PRINT WORDSEARCH (224 PAGES) - CODE: PZ018

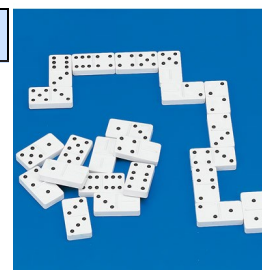

There are 176 puzzles, with clues and wordsearch grid letters in 18 point font. Solutions are nice and clear in 12 point font.

Good quality paper means minimum ink showing through.

EASY-TO-SEE TACTILE DOMINOES, RAISED DOTS - CODE: GB108

Set of 28 double six easy-to-see and tactile dominoes – ideal for any keen player and great for playing by sight or by touch.

These white plastic dominoes have raised black dots and a tactile ridge dividing the two halves. They come in a black plastic case for easy storage.

UNO BRAILLE CARD GAME - CODE: GC06

A game of skill and chance for two to 10 players using easy-to-see cards embossed with braille. Each easy-to-see card is embossed with contracted braille in the top left and bottom right corners. Printed characters are approximately 3cm (1.2 inches) high. Pack contains 108 cards.

This is only a small selection of the games & puzzles products we stock, please visit our website at www.edwardmarcus.co.uk to see the full range and for full product information. Please note we can supply the full range of the Royal National Institute for the Blind products. Please contact our offices if you wish to order anything not shown in this catalogue or for any advice.

PELI LENSES - FOR TRADE CUSTOMERS ONLY

Using high-powered prisms, the Peli Lens helps patients with peripheral vision loss attributed to Homonymous Hemianopia by expanding a hemianopic patient's awareness of their blind side by over 30 degrees. This awareness enables patients to better detect obstacles and navigate around them. Edward Marcus Ltd is Chadwick Opticals sole UK supplier of Peli lenses. For full information please visit our website at www.edwardmarcus.co.uk for links on all Peli Lens information.

PELI EVALUATION KIT

PEK	Peli Evaluation kit
-----	---------------------

Chadwick Optical created the PEK (Peli Evaluation Kit) as an all-in-one solution for you to quickly demonstrate the Peli Lens to your patients and determine if they can benefit from it. They have been working with doctors and therapists for over 20 years to help patients with homonymous hemianopia regain as much visual field as possible (while improving their quality of life). The Peli Lens has been proven time and again to be the best solution for helping homonymous hemianopia patients expand their peripheral vision. But, they discovered that demonstrating the Peli Lens in-office can be cumbersome.

Why? Because the Peli Lens comes in two lens types (horizontal or oblique) and patients are afflicted in either their left or right eye. Up until now, this has required keeping multiple pairs of glasses or fitovers on hand to use in the demonstrating process.

The other option has been to attach training prisms to the patient's glasses to try them out. The drawback of this approach is that patients do not get the benefit of switching between their normal corrected vision and training prisms multiple times. Once training prisms are attached to the patient's glasses, that's it. And, training prisms are about 50% weaker than the permanent Peli Lens.

Enter the PEK.

The PEK is a compact way for your patients to quickly and easily take the Peli Lens for a test run. In addition to being super easy to use, the PEK lets you demonstrate the full-powered Peli Lens in a removable format over either eye.

Here's what's included:

Oblique Lens suited for patients who need field expansion for driving or mobility

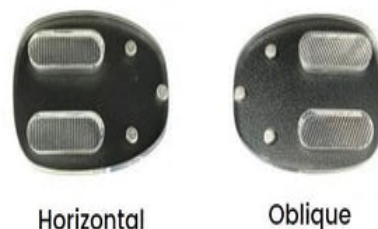

Horizontal Lens suited for patients who want improved mobility

Fitover frame: using 3 magnets embedded into each side of the fitover frame, you can attach either lens to test oblique and horizontal prisms on the right or left eye without requiring your patients to take off their glasses (it also works for patients who don't wear prescription glasses)

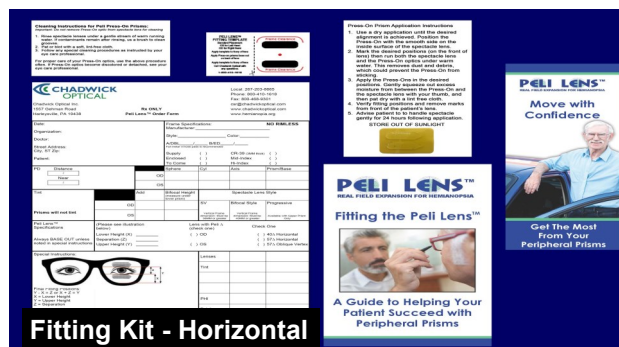

Training Prisms Kit: our training prism kit lets you practice fitting and training patients for a 4-to-6 week trial. If you're ready to help your homonymous hemianopia patients benefit from expanded visual field, order your PEK today!

Getting the Peli Lens for Your Patients

After more than 20 years helping doctors obtain, fit, and train their patients with the Peli Lens, Chadwick Optical have streamlined the process into 5 simple steps:

- Ensuring the Peli Lens is the right solution
- Demonstrating field expansion
- Fitting patients with training prisms
- Monitoring at-home training
- Ordering full-power prisms

Peli Lens training prisms give your patients the opportunity to test out peripheral prisms before moving on to full-power prisms.

The goal of the Peli Lens is to help patients make the most use of their remaining vision.

By placing peripheral prisms in the patient's blind side, they can notice movement and contrast from their missing visual field.

This often enables patients to significantly increase their awareness of their blind side.

These refill kits contain the same press-on prisms as the temporary prism kits but are sized to fit in the PEK (Peli Evaluation Kit) shown on the previous page.

They're also a great option if you're looking for training prisms with more compact packaging. Included with each kit is:

- A pair of Horizontal or Oblique press-on peripheral prisms
- An occluder
- A fitting template
- A patient card with information and lens tracing

Revolutionary device for patients with Hemianopsia.

The stick and clip-on are great for in-office screening.

Peli press-on prisms are available in (4 pair bulk pack or 1 pair pack) as an alternative to permanent lenses or for patient to test before ordering permanent lenses.

Economically affordable.

Fitting instructions are available.

- Peli Lens Resources for Patients

Reading this text will help you predict the level of magnification that you are likely to require in order to read newspaper size print.

Obviously this prediction can only be used as a rough guide since many other factors – including the level of lighting or the strength of your current reading glasses, can affect the level of magnification needed.

To get the most out of this test:

Always wear your reading glasses, even if you have found them of little benefit in the past.

Size N10
2.x
power

Use a desk light to add additional light onto the page. For best results direct the light in front of you onto the prediction chart.

Hold the words at 25 centimetres (10 inches) from your eyes or at your preferred distance where you feel most comfortable and can see the chart easily.

Size N12
2.5x
power

Starting with the smallest print, read down the various print sizes until you find where you can read comfortably. The smallest print size that you can comfortably read should then be used for your prediction.

Size N16
3x
power

Look at the recommended lens power written on the right hand side below the last print size that you can read.

Size N20
3.5x
power

For example if the smallest print size you can read at 25cm is N32, then you require approximately +16d (5x) magnification in order to read newsprint.

Size N24
4x
power

If you are struggling to read this print you probably require magnification of 7x or above. Please note lens sizes at this strength are very small.

Size N32
5x
power

Welcome to the Edward Marcus Ltd's 2024 catalogue. Edward Marcus Ltd is the UK's premier supplier of magnifiers and low vision aids, a friendly, family, run business established in 1945.

Our current catalogue showing the range of products we supply. Edward Marcus is in a unique position to supply the widest range of low-vision aids and magnifiers from the world's leading manufacturers. Being a Coil Master Distributor for the UK and Ireland and holding the largest stock of Coil, Eschenbach & Schweizer magnifiers within the UK, we supply direct to the public as well as many hospitals, schools, opticians, optometrists, low-vision schemes and in addition we are also the sole supplier to the Welsh Assembly Low Vision Scheme; which incorporates over 220 opticians; the PK National Eyecare Group and Sight Care Services.

At our office and online shop, as well as Schweizer and Eschenbach products we also stock products from Daylight Company, Coil, Specwell, Noir Medical, Magnifico & RNIB.

As a specialist company we are often able to fit in with various supply and invoicing arrangements. All our products are supplied on approval with 10 days trial.

Do not hesitate to contact our friendly team if you require any further information.

Magnifications are given as a guideline, to compare products please check dioptic powers.
(Prices liable to change without notice)

Terms and Conditions of Supply:

All invoices will be priced based on the price ruling on the date of supply.

These may be amended without prior notice, due to currency fluctuations of supplier price rises. All goods remain the property of Edward Marcus Ltd until paid for in full. **E.& O.E.**
